EDUCATION

Monark University - Vahelal , Ahmedabad   *January 2023 - April 2025*
Bachelor Of Computer Application

EXPERIENCE

Brainy Beam Infocom Pvt Ltd— *Mern Stack Developer Intern*   (Ahmedabad)   *December 2024-Present*

- Developed and maintained full-stack web applications using React.js, Node.js, and Express.js.
- Designed and implemented RESTful APIs for seamless communication between frontend and backend.
- Managed MongoDB database, optimized queries, and enhanced performance.
- Integrated JWT authentication for secure user authentication and authorization.
- Worked on state management using React Hooks & Context API for efficient frontend performance.

SKILLS

NODE JS| EXPRESS JS | C++ | REACT | JAVASCRIPT | HTML | CSS | MONGO DB | GITHUB | MONGO ATLAS | VUE JS | SAP| GIT

PROJECTS

E-Commerce Website (React.js)   *feb2025*
Tech Stack: React.js, React Router, Context API, Local Storage

- Product Listing & Display: Showcased products dynamically using React state and props.
- Product Filtering & Search: Implemented category-based filtering and a search bar for easy navigation.
- Shopping Cart Management: Enabled users to add, remove, and update cart items.
- Persistent Cart Data: Used Local Storage to save cart data even after page refresh.
- React Router for Navigation: Created multiple pages (Home, Products, Cart, Checkout) with seamless routing.
- State Management with Context API: Managed global state efficiently to avoid prop drilling.
- Responsive UI: Designed a fully mobile-friendly and user-friendly interface.
- Modern Styling: Used CSS and Bootstrap for a clean and attractive design.

To-Do List Application (MERN Stack)
Tech Stack: React.js, Node.js, Express.js, MongoDB Atlas, React Router, Context API, Axios
Frontend (React.js)
                                    November2024

- Task Management: Users can add, edit, delete, and mark tasks as completed.
- React Router for Navigation: Implemented multiple pages for task management and authentication.
- State Management with Context API: Managed global state efficiently for tasks and user authentication.
- Axios for API Calls: Used Axios to communicate with the backend and fetch/update tasks.
- Responsive UI: Styled with CSS and Bootstrap for a clean and modern look.
- Persistent User Data: Stored user authentication state in local storage for a seamless experience.

Backend (Node.js & Express.js)

- RESTful API: Developed secure API endpoints for CRUD operations on tasks.
- User Authentication: Implemented JWT authentication for secure login/signup.
- Data Storage: Used MongoDB Atlas to store tasks and user information.
- Middleware Protection: Secured routes to ensure only authenticated users can manage their tasks.
